Coin sets featured on colour pages:

Inside front cover — three colour pages (A, B & C)

- A 2008 Fine Silver Year Set (featuring 20 cent silver proof coin and \$1 silver proof coin)
 - 2008 Year Set International Year of Planet Earth (featuring \$1 proof coin and 20 cent uncirculated coin) and
 - * 2008 "C" Mintmark 100 Years of Australia's Original Coat of Arms (featuring \$1 silver proof coin and \$1 uncirculated coin)
- 2008 Icons of the Commonwealth (featuring AU\$25 Gold Kangaroo at Sunset coin; UK Gold Sovereign and CAD\$10 Gold Maple Leaf coin)
 - 2008 Centenary of Rugby League (featuring \$10 gold proof coin; \$5 silver proof coin and \$1 uncirculated coin) and
 - 2008 Centenary of Scouts Australia (featuring \$10 gold proof coin; \$5 silver proof coin; 50 cent uncirculated coin and \$1 uncirculated coin)
- C No coin products featured on this page. Blank page.

Inside back cover — three colour pages (D, E & F)

- D Collage of images of the Royal Australian Mint prior and during refurbishment
- E 2008 Great Australian Artist Series Reg Mombassa (featuring \$10 gold proof coin, \$1 selectively gold plated coin, \$1 fine silver proof coin; \$1 frunc uncirculated coin and \$1 silver frunc uncirculated coin)
 - 2008 Centenary of Scouts Australia (\$1 rolled coin)
 - 2007 APEC Australia (\$1 rolled coin)
 - $\bullet\,$ 2008 One Hundred Years of Quarantine Australia (\$1 uncirculated coin) and
 - 2008 State Series 30 Years of Territory Government (NT) and 150 Years of State Government (SA) (\$5 silver proof coins)
- F 2007 Royal 60th Wedding Anniversary (50 cent uncirculated coin)
 - 2008 Land Series Koala and Wombat (\$1 uncirculated coin)
 - \bullet 2008 Little Dinkums — Binny Bilby and Kip Koala (featuring \$5 gold proof coins)
 - 2008 Polar Series Antarctic Territory (Skua) (featuring \$5 silver proof coin) and
 - 2007 60th Anniversary of Australian Peacekeeping (featuring \$1 uncirculated coin).

13 October 2008

The Hon Wayne Swan MP Treasurer Parliament House CANBERRA ACT 2600

Dear Treasurer

I have pleasure in presenting to you the Annual Report of the Royal Australian Mint for the year ended 30 June 2008. The Report has been prepared under section 63 of the *Public Service Act 1999*. Subsection 63(1) of the Act requires that a Chief Executive Officer of an agency is to provide a copy of the Report to their Agency Minister for presentation to the Parliament.

As provided in subsection 63(1) of the Act, the Report has been prepared in accordance with guidelines approved on behalf of the Parliament by the Joint Committee of Public Accounts and Audit. These guidelines provide that a copy of the Annual Report is to be laid before each House of Parliament on or before 31 October.

Yours sincerely

Graham Smith

Acting Chief Executive Officer

Section 1 INTRODUCTION & OVERVIEW

Organisation at 30 June 2008

Corporate Profile

- e Royal Australian Mint (the Mint) became a prescribed agency within the Treasury portfolio on 1 July 2005, with responsibility for producing circulating coin for Australia. The Mint was established in Canberra in 1965, one year prior to Australia's changeover to decimal currency, and since 1983 has been the sole supplier of Australia's circulating coin requirements.
- e Mint also produces a range of high quality collector coins (numismatic coins) which are sold through an extensive mail order operation, a network of domestic and international coin dealers, Australia Post outlets and the Mint's own retail outlet. In addition, the Mint produces a number of Australian medals and awards, as well as tokens, medallions and jewellery items for domestic and overseas customers. e Mint is also a major Canberra tourist attraction with a public gallery, museum and shop that attracted approximately 124,000 visitors during 2007–08.
- e Mint is committed to upholding its reputation as one of the leading producers of quality coins in the world and to achieving business excellence.

The Mints original museum displays.

Vision

Excellence as a sustainable world class Mint.

Mission

To meet the circulating coin and numismatic needs of Australia.

Values

Commitment we believe in the vision and mission of the Mint, and pursue with

enthusiasm and determination the achievement of its business objectives and the maintenance of a safe, healthy and happy work environment

Integrity we are open, honest and straightforward in the way we do our work,

and do not take improper advantage of our employment at the Mint

to achieve personal gain

Teamwork we understand that we depend on one another for e ective performance,

and are always on the lookout for ways in which we can help our workgroups

to be more exible, more e cient and more enjoyable to be in

Service we care about the needs of those – both outside and inside the Mint –

who receive the products of our work, and we try always to meet those

needs at the right time, at the right quality and at the right price

Innovation we continually seek to identify and implement better, safer and more

cost-e ective ways of doing what we do, encourage others to do the same,

and keep ourselves up to date on relevant developments elsewhere

Respect we treat one another with courtesy and consideration, and do not belittle

the contributions of others to the achievement of the Mint's vision and goals; we value diversity and renounce discrimination on grounds

of race, religion, sex or cultural background

Professionalism we take pride in the quality of our products, in the skills and standards

we apply to our work, and in our willingness to learn and to share

the bene ts of that learning with others

The Mint's Service Charter

Services

- We aim to meet your needs as a customer efficiently and promptly, and always look for ways of improving the quality and timeliness of our service.
- We seek to respond promptly to any issue you may raise related to the history, production and distribution of Australian coinage and numismatic products.
- You may contact us through our internet site or by mail, email, phone or fax using the address and numbers given in this publication.
- When you contact us we will be courteous, helpful and prompt in any follow up actions required.
- Your first contact person will keep you informed of the progress of your request or may direct your request to a more appropriate person.

Response

- We will clearly identify ourselves when you contact us by telephone and will ask for specific contact information from you.
- Your discussions will be treated with respect and confidentiality.
- If you contact us by phone during business hours (8.30 am to 4.30 pm), we will address
 your query immediately or advise of when a response can be expected. If you contact
 us by phone out of normal business hours your call will be recorded and we will aim
 to call you back during the next working day.
- Your contact by mail, fax or email will be acknowledged within five working days of receipt.

Complaints

- We will address all complaints in terms of the Australian Standard AS 4269-1995
 Complaints Handling and of the Trade Practices Act 1974.
- If you return products, please include your contact details. If you are currently included
 on our mailing list please advise your customer number. We aim to respond within
 one week of receipt.
- If you continue to have a problem, our customer contact sta will try to resolve the matter, but if necessary, you will be referred to the appropriate manager.
- If the matter is then not resolved, please contact the Chief Executive Officer (CEO) with all details. The CEO will respond within one week of receipt of this contact.

Note: is Service Charter is not legally binding on the Royal Australian Mint, but is an expression of the standards we seek to achieve and maintain

Resources for Outcomes

Key priorities in 2007–08

The Royal Australian Mint's 2007–08 Portfolio Budget Statements and internal planning processes identified the following key priorities for Outcome 1:

- Satisfy the Reserve Bank of Australia (RBA) forecasts for circulating coin by monitoring the forecasts and matching production to the forecasts.
- Promote public understanding about the cultural and historical significance of coins.
- Provide advice on coin related issues

Key Outcomes in 2007-08

Outcome 1 – Satisfy the Reserve Bank of Australia's forecast for circulated coin

	(1) Budget* 2007-08 \$'000	(2) Actual revenue and expenses 2007-08 \$'000	Variation (column 2 minus column 1)	Budget** 2008-09 \$'000

Output 1.1.1: Coin production, associated policy advice and visitor services

The Mint delivers a single output – 'coin production, associated policy advice and visitor services'.

Performance Information

e key performance indicators are:

- Advice meets Treasury Portfolio Minister's needs in administering their responsibilities and implementing Government decisions as they relate to coinage and the Royal Australian Mint operations.
- Produce circulating coin to Reserve Bank of Australia needs.
- Meet financial performance targets.
- Maintain the National Coin Collection and the Royal Australian Mint's Visitors Gallery
 and promote public understanding about the cultural and historical significance of coins.

Analysis of Performance

During 2007–08, the Mint continued to provide a professional level of advice to the Treasury Portfolio Ministers, and liaised as appropriate with other agencies on a range of issues relating to coinage and Royal Australian Mint operations. e Mint responded to ministerial correspondence, provided relevant information, and met all other ministerial procedural responsibilities.

Whilst continuing to produce circulating coins based on forecasts provided by the Reserve Bank of Australia (RBA), the Mint focused its attention on ways to improve accuracy in meeting the circulating coin requirements of the Australian community. e Mint engaged directly with the commercial banks, and as a result, now has a better understanding of the issues that impact on the demand for circulating coins.

e Mint's visitor gallery continues to be an important attraction in the Canberra region. It is a significant stop for visiting tourists and for school children as part of their education curricula. e public tra c continued despite the fact the Mint premises are under renovation. e Mint its gradually upgrading its communication channels with the general public. It has recently upgraded its web site and the next phase will see enhancements to our call centre capabilities.

Section 2 CHIEF EXECUTIVE REPORT

Chief Executive's Review

In 2007–08 the Mint continued its journey towards Excellence as a sustainable world class Mint.

Our ability to identify and address the key issues we face in achieving our vision has been enhanced by expanding the Senior Management Committee. This has freed Senior Managers to focus on the strategic issues that support our vision and drive the numerous projects we are undertaking.

In addition to the major refurbishment and modernisation of the Mint's premises, we have identified the need to improve our IT systems. The proposed new system will support the Materials Handling and Warehousing System (MHWS) and Enterprise Resource Planning (ERP) to achieve increased automation, integration and reliability of information and improved reporting for decision making.

Sta in all areas of the Mint, in addition to their normal duties, have been engaged in a wide range of projects. ese activities are working together to achieve a more modern, e cient, innovative, quality aware and sustainable Mint.

The internally focused projects have been added to and supported by a number of other projects we are undertaking with a range of external agents, in particular the Treasury, Department of Finance and Deregulation (Finance), the RBA and other members of the Australian Payments Clearing Association (APCA). A number of these projects are interrelated and will progress closely in parallel. e aim is to achieve a closer relationship between coin demand, forecasts and actual orders. is includes establishing a bu er stock of coins to assist with business continuity planning and smoothing of the production process through the year.

The Mint's outcomes and outputs were clarified in the 2008–09 Commonwealth Budget. This clarification frees the Mint to confidently pursue contracts with foreign governments, overseas dealers and suppliers and better re ects past and present activities.

The 25th biannual Mint Directors Conference (MDC) was held in South Korea in May 2008. With the support of the Government, the Mint was chosen to host the next MDC in Canberra during September 2010. is will provide us with a valuable opportunity to showcase our modern facilities and quality products to the rest of the world's minting fraternity.

e Mint has implemented a wide ranging and holistic approach to training its sta as a way to counter the tight labour market in Canberra, new work requirements owing from modernisation processes and the ageing of the Mint's workforce. We expect to meet the current and expected demands of the organisation, while also responding to individual skill development needs identified through the new Performance Development System (PDS).

is training has already yielded dividends for the Mint and its employees who have been successful in competing for new or upgraded positions identified in the 2006 Organisational and Workplace review.

We have put in place a whole of Mint communication and change management strategy to assist with the management and integration of our projects. is strategy aims to keep all sta informed of the progress and implications of change for their work practices. Focus groups are providing a forum for staff to raise improvement ideas or concerns as they arise. Feedback from these groups shows that although staff are suffering the di culties of working around the refurbishment, and additional projects and training, their morale is being maintained. We are focusing on the benefits to working conditions and careers, and not the small set backs and irritations that arise in reaching those ends.

Outlook for 2008-09

Training for the future will focus in particular on preparing employees to work within the more automated environment they are helping to develop in the Mint. Specific training in response to an Improvement Notice issued by Comcare will emphasise hazard awareness and the preparation of and adherence to safe working methods.

The revised Agency Agreement that is expected to take effect from August 2008 will continue to provide a framework within which a cooperative approach to production is encouraged. We will continue to seek to improve the Mint's ability to make products that the market wants in a timely, efficient and profitable manner at the same time as providing employees with job security, improved career opportunities, training, working conditions and competitive remuneration. e agreement will also continue to reinforce the commitment given by all parties to the Mint Values and Code of Conduct. e improved methods of measurement and accountability being implemented with the new ERP system will give the Mint better measures of productivity improvements for future Agency Agreements.

Management Framework

As a prescribed agency the Mint continues to operates under a Charter endorsed by the Secretary of the Treasury, Dr Ken Henry AC, and the CEO. The Charter was updated during the year to better reflect the relationship between the Treasury and the Mint. It sets out the scope of the roles and accountabilities of the principal stakeholders in producing circulating coins and like products for Australia.

e Mint Advisory Board provides strategic advice and reviews Mint performance against key indicators and strategies in the Mint's Strategic and Business Plans. At 30 June 2008 the Advisory Board comprised:

- Ms Deidre Gerathy, General Manager, Corporate Services Division, Treasury (Chair);
- Mr Ross McDiarmid, Chief Operating Officer, Dyesol Limited;
- Mr Michael Del Gigante, Managing Director, Defence Housing Authority; and
- Mr Geoff Miller, General Manager, Corporations and Financial Services Division, Treasury.

Management of the Mint rests with the Senior Management Committee which at 30 June 2008 comprised: Ms Janine Murphy, Chief Executive Officer (CEO); Mr Graham Smith, Deputy CEO; Ms Marlene McClelland, Chief Finance Officer (CFO); Ms Felicity Mullens, Strategy and Business Development Manager; Dr Prabir De, Chief Operating Officer; Ms Winnie Turco, Human Resources Manager; Mr John Denyer, Production Manager; Mr Dominique Appay, Production Services Manager; Mr Stephen Delaney, Chief Information Officer; Mr Sam Murthi, Acting Planning and Quality Manager; Mr Bruce Webber, Communications Manager; and Mr Michael Ellery, Facilities Manager.

Section 3 MANAGEMENT & ACCOUNTABILITY

Refurbishment Project

Significant progress has been made on the Mint refurbishment project which commenced in October 2006 and is due for completion in mid 2009. Two of the six project stages were completed in 2007–08.

The first completed stage was the basement and relocated loading dock. This area allows the Mint to make better use of storage space and to have more eccient receiving and despatch functions. It has also removed a major risk to the Mint, that is having truck movements in shared public trace areas. esecond completed stage was the circulating coin hall. Also completed at this time was a new 8 tonne goods li. It provides direct access between the circulating coin hall and the basement and is large enough to transport forklis, heavy production equipment and large quantities of coin product. is list the largest of its type in the southern hemisphere.

e delivery of the project has resulted in a number of challenges. ese challenges came about because of the age of the building and the complexity of the production processes. Additional funding was sought by the Department of Finance and Deregulation and the Mint to achieve the full potential of the refurbishment project, as initially agreed to by the Government. An increase was required in the project budget from \$41.2 million to \$66.4 million. The additional funding was approved in October 2007 and a revised project brief was presented to the Parliamentary Standing Committee on Public Works in April 2008.

It is a challenging and exciting time for Mint personnel who are benefiting from the improved facilities provided by those stages of the project already delivered. Employees have displayed patience and understanding in working in and around the disruptions and relocations required by the staged process and the requirement that the Mint continue to operate on site during the refurbishment. We are all looking forward to the completion of the project in mid 2009. The Mint will be a modern, e cient and secure manufacturing facility. It will provide a safer and more comfortable workplace. It will o er visitors a more modern and exciting public gallery and will improve the display of the National Coin Collection.

The new tunnel: creating opportunities for efficiency and automation.

IT Services

Modernisation and improved integration of the Mint's Information and Communications Technology (ICT) has been a primary area of focus over the year and will continue to be into the future.

A significant change has included the appointment of a Chief Information Officer (CIO) to head the IT Services Branch and to change the focus of Information and Technology Management at the Mint from one of supporting existing IT systems to one of identifying and implementing new business technology solutions and improving information governance. As a member of the Mint's Senior Management Committee the CIO brings another dimension to deliberations on the appropriate use of technology to achieve the strategic goals of the organisation.

The focus during the 2007–08 financial year has been on the provision of a stable Information Technology platform for the Mint. is included lifecycle upgrades to the current servers and parts of the workstation fleet, upgrades and expanded use of virtualisation and the implementation of new so ware to perform all data backup and recovery.

A range of key initiatives were completed during the 2007-08 financial year, including:

- The introduction of a range of IT Security controls, including policies, firewalls, spam filtering and auditing as well as a comprehensive employee security awareness program.
- A strong focus on information management, with formalised training for all sta on record keeping practices and awareness.
- Introduction of menu based word processing templates to standardise the creation of Mint correspondence.

An ambitious range of projects is planned for the 2008–09 financial year that will modernise the manufacturing and corporate operations of the Mint.

e cornerstone project is the implementation of a new integrated IT Business System to replace a range of different systems. The tender process and evaluation occurred during the 2007–08 financial year. Implementation will occur over a period of 14 months commencing in September 2008 and finishing by January 2010.

The IT Business System will consist of numerous software products that will be linked and operate as a single system. It will cover all aspects of the Mint's operations, including Enterprise Resource Planning, Financial Management, Logistics, Payroll, Human Resources, Production, Quality Assurance, Asset Management, Sales, Customer Relationship Management and Electronic Document Records Management.

The IT Business System will interface to the Materials Handling and Warehousing System to enable manufacturing orders and reporting to be controlled by a single system.

The IT system will also provide a programmed process for the collection, analysis and reporting of input and output data in the production process and an accurate and timely reconciliation of all coins during each stage of the production process. This will allow the Mint to quickly identify any inconsistencies in coin production and storage, and will therefore address the one outstanding recommendation from the 2006 Australian Federal Police Security Risk Review.

A range of other projects linked to our strategic and business needs also commenced in the 2007–08 financial year and will be completed in the 2008–09 financial year. They include:

- Replacement of the Mint PABX and data communications infrastructure.
- Introduction of a new platform for our corporate intranet. This will provide electronic forms, collaboration and workflow functionality.
- Upgrade of server, data storage and desktop computing equipment to provide a suitable platform to operate the new IT Business system.
- Connection to FedLink to enable secure electronic mail at the In-confidence level with other government agencies.
- Development of a Mint Information and Knowledge Management Strategy and the introduction of electronic record keeping.

Materials Handling and Warehousing Project

The focus of this project in 2007–08 was the development of detailed specifications of outcomes, tendering for and subsequent letting of a contract. Working with the successful tenderer, we have designed a system that meets the original aims of the project outlined in last year's Annual Report but has enhanced environmental benefits. For example, the Materials Handling and Warehousing Project (MHWP) is expected to achieve reductions in cardboard paper consumption of approximately six tonnes each year. Another benefit from the MHWP will be that vision from remote cameras will be linked to the foyer and visitor gallery to give visitors a closer view of operations.

Challenges for the year ahead include the change management process, specifically in the areas of technical skills and cultural practice. The MHWP is continuing to be managed to meet the project program and stay within budget. Careful attention to contract and relationship management is required. Expectations remain high that a successful project will be delivered in March 2009 to coincide with the completion of the refurbishment project.

Management of Human Resources

Sta morale has been positive across the Mint considering the change processes occurring as a result of the refurbishment project and subsequent closure of specified work areas. Although disruptive at times to employees normal working arrangements these changes have also provided a timely opportunity to address past shortcomings in training and development. e scheduled close down periods have enabled the rolling out of comprehensive sta training programs. ese programs have been well received by sta .

Performance Development System

the Strategic Plan, Operational Plans and individual plans.

The Mint's Performance Development System was reviewed by the CEO in consultation with focus groups to provide a transparent and objective system that is user friendly and aligns with the Mint's Strategic Plan.

Training was provided to all sta concerning the implementation of the system. e training was judged a success and identified a few areas where we needed to further simplify the process. is has enabled a consistent application of the appraisal process across the organisation. Managers, supervisors and sta now have a better understanding of the relationship between

Royal Australian Mint Union Collective Agreement and APS Values

The 2008–10 Royal Australian Mint Union Collective Agreement was negotiated under section 328 of the *Workplace Relations Act 1996.* A majority of sta voted on 4 July 2008 to accept the Agreement which is expected to take effect in August 2008.

Key features of the Agreement include:

- flexibility in working arrangements
- · one week paternity leave
- closedown between Christmas and New Year
- four per cent pay increase on approval and a further four per cent twelve months later and
- a commitment to continued formal and informal consultation between management and employees

Workplace Relations

e Mint has a range of formal and informal consultative arrangements including the Mint Consultative Forum which meets regularly. The Consultative Forum is chaired by the CEO and comprises management and elected employee representatives, and representatives of the Community and Public Sector Union and the Australian Manufacturing Workers Union.

e Mint is committed to discussing workplace issues in a spirit of cooperation and trust, ensuring employees receive information on workplace issues a ecting them, including business progress and the impacts of new programs. e agreement also allows scope for employees to contribute their views on these issues. is is particularly important in the current period of change within the Mint.

Recruitment and Succession Planning

e Mint continued to focus on recruitment and retention as a major strategy. Recruitment activity last year resulted in 36 promotions, 25 appointments and three non-ongoing staff converting to ongoing employees. This is an indication that the increased development opportunities o ered to sta have improved our retention rate by enabling the Mint to promote and appoint sta from within the organisation.

e Mint will begin to realise its investment in its apprenticeship program later in 2008 when four of our apprentices can be considered for ongoing qualified trade positions. Our apprentices have also been recognised by the Canberra Institute of Technology for dedication to learning. One apprentice, Mr Anthony Palasrinne, has joined the Government's initiative on the national 2008 Apprenticeship Roundtable discussions while another, Mr Adrian Boucher, won a scholarship from the NSW Business Chamber, participated in an exchange with the Royal Canadian Mint and an apprentice placement at the Australian National University.

We will continue to monitor and review our workforce plan to take account of future projected losses in key areas through retirement by increased training and where necessary specialised technical skilling of our sta .

Janine Murphy, CEO and Adrian Boucher at the NSW Business Chamber Awards.

Training

A training unit was set up in 2007–08 and initially addressed the immediate need for upgrading the skills of our state of enable them to be competitive in securing ongoing positions in the Mint. The first round of the new Performance Development System in 2007 further identified corporate as well as individual development needs across the organisation. Training is an area of primary focus in the Mint. Among the training programs conducted in 2007–08 were courses on interview techniques, getting that selection right, presentation skills, report writing skills, project management, a program on leadership, basic and advanced computer training, strategic thinking, communication and negotiation, financial management, leading teams, policy formulation and many more. State attended a total of 846 training places during the year.

One of our success stories is the assessment and development of English as a Second Language training which was carried out over two weeks and addressed the specific requirements of this group of staff. Internal conversation classes have been developed as an extension of this ESL training, to enable sta—to keep building on their knowledge.—ere has also been a variety of internal governance training courses that have been trialled and will now be conducted annually along with courses specific to new Mint employees.

The cost of training courses attended by Mint employees for 2007-08 was \$456,564.

In an environment of continuing change, the Mint will focus on further development of our state to address skill shortfalls and ensure we recruit and retain talented people for our business. We will concentrate on our OH&S obligations and compliance to maintain a high standard of health and safety for our state. Our commitment to continuous improvement and best practice will also be high on our agenda.

Occupational Health and Safety (OH&S)

e Mint is committed to providing a safe and healthy workplace for employees, contractors and visitors. All reasonable steps are taken to control or eliminate hazards and minimise the risks associated with production and day to day activities.

In February 2008 the Mint engaged a consultant to undertake the annual OH&S audit against AS4801:2. e auditor noted that there had been some dramatic improvements in compliance, but while there had been many successes there was still room for improvement. e Mint continues to work toward compliance in all areas.

Workstation Assessments were provided for 22 staff during the year. Under our Collective Agreement 111 employees took advantage of the Mint's Healthy Lifestyle Payment. This one-off annual payment is available to contribute to activities such as gym membership, quit smoking and similar activities which promote a healthy lifestyle.

Testing of staff for exposure to nickel, chromium and other heavy metals was completed and results were within normal limits. As part of the Mint's Hearing Conservation Program, and to ensure legislative compliance, 99 sta had hearing tests. Additionally, free in uenza vaccinations were made available to sta during the year.

Mint Health and Safety Representatives continue to fulfil a vital role in reviewing current work practices and actively promoting safe work practices across all areas of the Mint. ey undertake regular workplace inspections to an agreed schedule.

There were a total of 23 First Aid attendances during the year. There were 30 Accident Reports and 102 Incident Reports this year. e increase in Incident Reports was contributed to an increase in staff awareness of OH&S reporting obligations and incidents associated with the refurbishment project. A comprehensive investigation was undertaken for all Accident and Incident reports. Remedial actions were taken where appropriate, and in some instances new work instructions were written.

There were six Workers Compensation Claims lodged of which five have been accepted and one is to be determined. ese claims resulted in 49 lost time days.

The Mint has notified Comcare of eight dangerous occurrences. Comcare inspectors have investigated three occurrences and have issued a Do Not Disturb Notice and a Prohibition Notice. e notices were issued in relation to an incident during the movement of a press.

The Mint will work toward raising the profile of OH&S and continue the comprehensive OH&S staff training program to meet best practice standards. We have set a target to reduce the number of incident reports by 15 per cent

The Mint is applying engineering solutions to reduce repetitive tasks and the potential for injuries.

Sta will be working in safer areas after the refurbishment is completed. Major changes to the workplace will deliver improved ergonomic considerations, better lighting, ventilation and thermal comfort.

Sta ng information

All sta are employed under the Public Service Act 1999.

The Mint operative and paid inoperative sta by classication and gender (at 30 June 2008)

Workplace Diversity

The Mint respects and appreciates the cultural diversity of its workforce. Forty one per cent of employees are from countries where English is not the spoken language and six per cent were born overseas in countries where English is the first language.

The Workplace Diversity Program continued to formalise the Mint's commitment to ensuring employees in identified groups have fair access to recruitment, training and promotion opportunities. The Mint has a Mature Age Workforce Policy to provide measures that continue to support older sta who wish to remain in the workforce.

To assist employees in balancing work, family and other caring responsibilities, the Agency Agreement leave conditions allows employees to use their personal leave entitlements to care for immediate family members who are sick. Applications for part-time work are considered favourably. Flexible working hours are available to fit in with family commitments. Working from home is also o ered to sta to balance work and family commitments.

ere is also an additional entitlement of two weeks paid maternity leave. e maternity leave and the additional leave may be taken at half pay. e new Agreement includes an entitlement of one week paternity leave. Executive level employees are able to make use of flexible working hours in the same way as all other Mint employees.

Our current ESL training programs for staff reinforces our commitment to providing more opportunities for sta in this group to advance their careers.

Disability Strategy

e Mint continued to support and encourage our disabled employees. e Mint maintained a relationship with disability support groups, especially in monitoring and supporting the special needs of one of our long-term employees. We address special needs on an individual basis and where necessary make adjustments to their working environment, for example, through modifications to workstations, access to special software, parking, and hours of duty, and specific job tasking. We also work with peak bodies, looking at developing strategies that support and encourage the employment of sta with disabilities.

e Mint's website complies with *Web Content Accessibility Guidelines (W3C)*, allowing customers to provide feedback, make inquiries and order Mint products via the internet.

The Mint fulfils its obligation under the *Disability Discrimination Act 1992* with regard to its tourist facility. e refurbishment of the Mint which is currently underway will provide facilities that meet the Mint's obligations under the Act.

Special Projects

Bulk coins: a new delivery method

e absence of a reporting mechanism that allowed visibility of the whole of the circulating pool to the commercial banks resulted in the size of the coin pool growing by almost 94 per cent between 2004 and 2006. is growth created an unnatural demand for coins and resulted in increased resource usage, materials handling risks and transport and storage costs. The Mint has worked with the Coin Issues Working Group of the Australian Payments Clearing Association to develop a virtual coin pool system. e head o ces of commercial banks now report their coin holdings to the Mint and receive back a summary which allows for better planning of coin supply. is cooperative approach to managing the supply of coins has resulted in a reduction in pool size of almost 47 per cent from the peak in 2006 and made substantial financial and environmental savings in materials and energy from reduced output and transport.

Increased metal prices have created a risk of reduced seigniorage collection from low denomination circulating coins. is risk has been o set by the impact of a stronger Australian dollar on materials purchases and an increased demand of high denomination

coins. Three years ago the average face value of coins issued was 30.52 cents per coin. The denomination mix of issued coins in 2007–08 has increased the average face value to 35.67 cents per coin. The Mint is keeping a watching brief on metal prices, the evolution of the coinage mix and their effect on seigniorage.

e Business Continuity Plan (BCP) which was developed last year was subjected to testing this year. The testing simulated a realistic scenario to determine if the BCP was fit to protect the Mint against risks to its business. Results of the testing have been used in a continuous improvement process to further develop the BCP.

e Production Inventory Control Steering Committee (PICSC) model for the accounting and security of high value coins has been incorporated into the MHWP. The two teams have worked together to provide a best fit between the needs for security, accounting and production. The improvements in materials handling have helped to fine tune the inventory control model and have led to the PICSC sign-off of the Materials Handling and Warehousing System Stakeholder Approval of Project Broad Design. One major benefit coming from the MHWP has been the plan to reuse blank delivery drums throughout the coin production and distribution processes. e Mint has negotiated with cash-in-transit businesses to deliver coins in bulk using these drums. This greatly reduces OH&S handling risks in the depots and also reduces the consumption of petroleum-based plastics and timber-based pallets and boxes for combined economic and environmental benefits.

The Chief Operating Officer (COO) progressed a joint exchange program with the Royal Canadian Mint for a final year apprentice, Adrian Boucher. The three month placement was partly supported by the Roger Pysden Memorial Fellowship awarded by the NSW Business Chamber. Both Mints were impressed by the success of the exchange. The Mint will host a staff member from the Royal Canadian Mint early next year. The program aims to exchange knowledge and promote excellence in technical areas of coin production.

e COO chaired the Mint Directors' Technical Committee meetings. e Technical Meeting of Mints in ASEAN (TEMAN) was held in Malaysia in August 2007. This was followed in May 2008 by the 25th Mint Directors Conference in South Korea. The objective of this committee is to identify key issues relating to coinage materials, machines and processes and prepare strategies to address these issues in a cooperative and collegiate manner. Following a bidding presentation in Korea, the Mint has successfully won the right to host the 26th Mint Directors Conference in 2010. The CEO of the Mint has been elected the Vice President of the Mint Directors' Conference.

Over the next year we will create a framework, including developing relations with potential suppliers and host country agents, whereby the Mint can quickly and confidently respond to tenders from foreign governments to mint their circulating coins. This framework will also require us to re-examine the Mint's cost structures and identify priorities for reducing costs.

Planning and Quality Management

Quality Assurance (QA)

One of the important functions carried out by this unit is to conduct internal audits across the Mint to ensure we are complying with the requirements set out in the Mint's Quality Management System (QMS) and to ensure compliance with the international quality management standard ISO 9001 this financial year. An audit carried out by external contractors rea rmed the Mint's accreditation to ISO 9001. is was a pleasing result with input required by a wide cross-section of sta to achieve this rating. In addition, the QA Section visits the premises of suppliers to audit their QMS to ensure there is alignment with the Mint QMS and ultimately to maintain the integrity of our product.

Additional demands associated with the staged closures and reopening of various sections of the Mint as a result of the refurbishment program has increased the workload on the QA. QA processed, on average, 39 per cent more coinage dies and 75 per cent more coinage blanks over the previous year.

During the year the QA Section identified several areas where it can improve its own performance for the benefit of the Mint. In particular the unit will focus on:

- increased monitoring of supplier quality standards
- taking a more systemic whole of organisation approach to quality improvement
- engaging with all branches of the Mint to identify key quality concerns and developing quality processes and procedures
- education and awareness programs for staff and suppliers.

The scope to do this within existing sta resources will be achieved by:

- standardisation of viewing/inspecting equipment across the organisation
- a stronger focus on Whole of Mint quality activities
- exploration and acquisition of new technology, especially for inspection functions, to remove any subjectivity when inspecting final product.

Planning and Scheduling

Another key function within the Branch is Planning and Scheduling. In order to achieve sales and profit target the Mint pays particular attention to the most cost effective scheduling of purchases and delivery of inputs in manufacturing circulating coins and numismatic products. We aim to maintain an optimal level of goods for sale and a balanced workload, fully utilising the available human and financial resources.

As a result of working cooperatively with suppliers and with input from all areas of the Mint, it has been possible to produce additional stocks of coins to meet the forecast demand for coins during the scheduled shutdown periods of the refurbishment program.

A key focus for the next year will be to minimise inventory holdings and optimise production volumes to match with fluctuating numismatic demands. Planning and Scheduling will work cooperatively with Marketing, Production and Finance branches of the Mint to develop a whole of Mint policy for numismatic products.

Circulating coins

The 197 million circulating coins produced during the financial year was substantially lower than the previous year's production of 549 million pieces. This was because of the shut down of the Circulating Coin Section from October 2007 to January 2008 and the building of bu er stocks in the previous year. The demand for coins was 361 million pieces during the financial year which was fully met by using our stock holdings.

There will be a further closure of the Circulating Coin Section between late 2008 and early 2009 to install the Material Handling and Warehousing System. The Production Planning Schedule includes a front-loaded coining strategy to meet demand to the end of 2008 and the first six months of 2009 for circulating coins.

Production Services

Production Services plays a primary role in the preproduction preparation of coin designs and tooling for coin manufacture and improving related manufacturing processes.

A significant impact on the operation during the year has been the refurbishment project and the demands and stresses of the construction program which impacted on the way we delivered our services.

Early in 2008, the Toolroom was relocated from the area it had occupied since the Mint opened in 1965 to five temporary locations. Machinery was carefully relocated and some non-critical items were stored in an o -site location. e refurbished space will allow the opportunity for revising tooling processes and will help to realise ongoing gains in manufacturing e ciency.

In order to accommodate staged shutdowns of various aspects of the Mint's production process, Production Services delivered 3,600 circulating dies, 276 proof dies and 388 uncirculated dies, to meet the projected die demand until the end of 2008. Likewise, toolmaking efforts have produced over 10,500 coin press feeding "fingers" as well as die holders and anvils, coining collars and wear and repair parts. Over the remainder of 2008 improvements will be made to coin press tooling manufacture and a stock of press spare parts will be built to support circulating coin production in 2009.

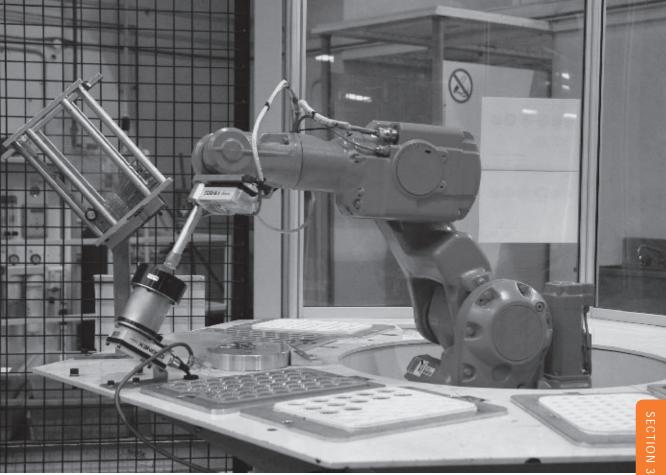

The time to deliver coin designs and master tooling was reduced by 50 per cent compared to previous rates. A total of 24 coin designs, plasters and master tools were produced to support the proof coining program adjusted to meet the refurbishment project. e unusually high demand for master tools early in 2008 was met by our two CNC engraving machines with additional sta being trained to support this demand. e remainder of 2008 will be spent in improving and consolidating design and engraving processes, and developing new coin designs and master tooling for future years.

Sta in the Toolroom conducted educational tours to demonstrate Toolroom processes to secondary school students and business visitors. e Toolroom continued to support and guide the education of nine Fitting and Machining apprentices.

Several innovative, automation projects were delivered during the year:

- e robotic machine for packing uncirculated coins was redesigned and rebuilt to improve throughput, reduce operator intervention, and to improve safety. has doubled the output of the machine, has self-maintaining features and is totally enclosed to protect operators.
- · A coin blank mass measuring machine was designed, built and tested, including the so ware to run the computer and the hardware to feed the coin blanks.
- e prototype coin alignment machine built in late 2006 has completed its trials and received a "makeover" in 2008. It is now in a more robust enclosure and its software has been expanded to include an unlimited number of coin types.

The "redesign for manufacture" project forecast last year completed a redesign task on nine circulating coin press feed tables. ey were rebuilt to eliminate 22 years of wear. in a saving over replacement of nearly 80 per cent of manufacturer's price. is year the project

Improved efficiency, accuracy and a safer workplace through automation.

is being expanded to include coining die manufacture with a holistic "design, manufacture and operate" approach to cost reduction and improvement. Preliminary tooling designs have been done for the Mint's proof coin presses.

The approach in the coming year is to augment our modern refurbished facilities with improvements in operations, people, equipment and processes.

Key activities will be to:

- acquire and apply better technologies to common operations
- train and improve the skills of staff in new technologies
- explore upgrades of existing machinery to improve performance
- research and acquire innovative processes for improving product quality and manufacture.

The outcome sought is to raise the standard of operations while reducing the costs of manufacture of tooling and products.

Operations

Circulating Coin Production

The circulating coin production area was closed for a period of six months from July 2007 to enable refurbishment of the area to be completed. A bu er stock of circulating coins was produced prior to the shutdown to meet demand.

e shutdown period provided a number of challenges. All manufacturing equipment needed to be removed for refurbishment to occur. Sta were temporarily moved to other production roles within the Mint or were involved in the refurbishment of the 13 circulating coining presses. The fitting of new and reconditioned tooling and components to the presses will extend their life by many years.

e refurbishment has acted as a catalyst to assist in our move to become a modern coining facility which in turn allows the Mint to move towards a lean manufacturing environment. This includes the introduction of a Visual Workplace including expansion of the Mint-wide

5S initiative. The Visual Workplace is being created with an emphasis on an uncluttered, organised work area, large noticeboards, visual devices and visual controls. is results in an improved understanding of work instructions, less work in progress and an increased level of accurate information on the manufacturing process available to all sta.

Since the hand back of the Circulating Coin area in January 2008, over 190 million coins across all denominations have been produced. It is planned that a further 250 million coins will be produced during the first 5 months of the 2008–09 financial year, in preparation for the next scheduled shutdown to facilitate the delivery of the materials handling and warehousing system.

There will be a continued focus on moving to a lean manufacturing environment with the introduction of Task or Action Teams. These teams will empower staff to make considerable contributions to the Mint's business outcomes with a focus on specific production or workplace issues. Further enhancements to the Visual Workspace including progressing 5S will be implemented.

Numismatic Coin Production

Numismatic coin production has focused on the preparation for a planned six month shutdown for refurbishment and to ensure that the Mint's numismatic coin release program would be una ected. is involved making su cient coins to meet all planned demand from August 2008 to February 2009.

A number of organisational changes were completed in 2007–08 to integrate the blank preparation and die polishing units into the Numismatic Section. ese changes have delivered better overall coordination of the production process with improved communications between the units. is led to a better quality of blanks delivered to coining and a more timely supply of dies.

For the first time a modern laser frosting machine was used to apply frosting to the dies used to produce high volume products. is dramatically reduced the preparation time for each die.

The Numismatic production facility will be closed for building refurbishment from July to December 2008. Several major pieces of new equipment will be installed with the completion of the refurbishment. These include a new Automatic Pickling Line to improve blank preparation e ciency and product quality and a physical vapour deposition (PVD) coating machine for die preparation. The PVD coating machine will reduce the demand for the chrome plating of dies and deliver an increased die life.

Numismatic coining presses will be extensively reconditioned during the refurbishment shutdown drawing on the detailed recommendations of machine specialists. This will extend the life of the presses and make them more able to deliver a high quality product.

Celebrating the Centenary of Scouting with a \$1 coin.

Marketing

A well planned and targeted marketing strategy is essential to sustaining the profitability of the Mint's commercial activities. In 2007–08 the Mint invested considerably in developing a whole of life product and brand marketing strategy that includes market research, the development of numismatic themes, product development, advertising, forecasting and sales through both wholesale and retail channels and customer feedback which underpins a focus on continuous improvement within the Mint.

Significant progress was made during the year in developing the market research function and this has led to a greater provision of market information within the organisation. During 2007–08, customer geo-demographic studies have assisted with product development and promotional activity. Research was also undertaken at several coin and agricultural shows and in the Mint Shop to gain an understanding of who visits the various Royal Australian Mint displays and to measure awareness of the Mint and its activities.

A formalised project tracking system was introduced and has produced e ciencies and improved communications throughout the Mint. In addition, a product matrix has been developed that ensures that a clearly defined range of products is released throughout the numismatic calendar and that each coin is appropriate for the target customers, including coins for younger collectors.

The Mint's principal points of sale are its wholesale distributors, call centre and shop. We have also attended local and international coin fairs and agricultural shows to increase the national and international awareness of our brand and products. Sales forecasting methods have been reviewed and improved. is has assisted production planning and call centre e ciency, and has resulted in reduced component wastage. Direct marketing tools are being applied to ensure that advertising for specific products is directed to the most appropriate customer demographics using the appropriate mediums.

Highlights of the numismatic program included the introduction of the Mint's new signature numismatic coin, the Kangaroo at Sunset, which sold out in record time. In response to the rising price of gold and the subsequent increase in demand, the innovative "Little Dinkums" 1/25 oz gold coins were successfully introduced. e terminology for the highly popular mintmark \$1 coins was reviewed. The terms "counterstamp" and "privymark" were introduced to the series to reject the evolution and maturity of this successful product. Community groups were supported by promoting organisations such as Scouts Australia, the National Rugby League, the International Polar Year and the International Year of Planet Earth through coin issues and their associated launches.

e Mint participated in joint marketing arrangements with Australia Post, the Royal Mint and the Royal Canadian Mint. is involved the supply of Royal Australian Mint products for inclusion in joint packaging and marketing arrangements. Coins that were supplied as part of these arrangements are shown in Appendix E.

The numismatic program that is planned for the next financial year will build on this strong foundation. Product themes have been carefully researched and the price points and packaging styles are appropriate for the target markets. Relationships with wholesale distributors are being revitalised and a new "Terms of Trade" agreement will be introduced to underpin the process. The opening of the refurbished entry foyer and shop in 2009 is expected to restore shop sales to their former levels and introduce more customers to our existing mail list. We will continue to review the e ectiveness of our marketing activities, product development systems and sales channels to best use our resources. Our Senior Management will continue to pursue strategic alliances with international partners in order to maintain the Royal Australian Mint's standing as a world class international Mint.

Museum, Gallery and Visitor Services

e Mint is responsible for maintaining the National Coin Collection. ese coins and other coin related artefacts are displayed in the public gallery and the tourism functions of the Mint.

There were approximately 124,000 visitors to the public gallery in the year 2007–08. is number reflects the continuing decline resulting from the refurbishment works and the closure of the observation gallery. Visitors are able to watch the up-to-date video, which now explains the refurbishment process, visit the "Treasures of the National Coin Collection", the Mint shop and are able to mint their own coins on the visitor presses.

Plans are being developed for the fitout of the new visitor's gallery, which is due to open early next year. The Mint participated in a satisfaction survey conducted by the University of Canberra across ten major Canberra attractions and the recommendations will be included in the final brief when they are available. The operations of the Museum and Gallery were audited during the year by independent auditors. e report concluded that the National Coin Collection is supported by policies and procedures and is secured within a controlled environment. ere were some recommendations for procedural improvements, the majority of which have been implemented. e National Coin Collection was independently valued at \$12,580,680.

e provision of Museum, Gallery and Visitor Services is designated as a Community Service Obligation (CSO) and is currently partly funded from seigniorage using a model approved by the Parliamentary Secretary to the Treasurer in 2003. The remaining cost of providing these services is cross-subsidised from the proceeds of the Mint Shop and visitor presses.

It is intended to review the funding of the CSO function in the financial year 2008–09. The review will take account of increased rents following the refurbishment and the need to continue to meet the public expectations on the Mint as a National Institution.

Acknowledgement and funding of the museum gallery and visitor services as a CSO will determine the extent of engagement the Mint can have with its visitors. In particular resolution of ongoing funding arrangements will determine whether the Mint can provide an educational experience for school tours that links closely with the school curriculum.

Communications

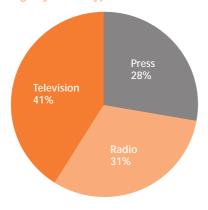

The rate of internal and external change and the number and complexity of projects has resulted in an increased need for structured and coordinated communications. Within the Mint we have added internal communications and change management functions to the Communications Branch to address these issues.

External Communications

One of the primary objectives of the Communications Branch is to achieve proactive, positive publicity for the Mint. We do this by overseeing our website, providing media liaison and media monitoring, responding to enquiries from the public, undertaking issues and crisis management and managing the Royal Australian Mint brand.

The Royal Australian Mint was mentioned 163 times during the year in television, radio and press items. is coverage potentially reached 10 million Australians and is equivalent to advertising valued at almost \$700,000 (see analysis in diagram below). We achieved frequent mentions in specialist numismatic publications and used our presence at international events to build additional relationships with the numismatic media.

Volume of Media Coverage by Media Type

Media Type	Volume	Audience/ Circulation	Advertising Space Rates (\$)
Television	67	1,074,682	413,006
Press	45	8,023,561	179,330
Radio	51	753,800	66,439
Total	163	9,852,043	658,775

Launching the 2008 products Hollywood style.

During the year we have received television coverage on a number of commercial stations. ese segments, which were predominately aimed at a children's audience, have promoted the Mint as a tourism destination and raised awareness about the Mint's function of producing Australia's circulating coins.

The Communications Branch has also been responsible for coordinating five product launches this year which have generated product awareness, domestic regional and metropolitan media coverage, and mentions on international numismatic websites. Our major product launch in November attracted a number of dealers and coin collectors who enjoyed the Hollywood opening night theme.

Graphic Design

Our unit of two graphic designers is responsible for setting and maintaining high standards when designing all packaging, promotional material and corporate requirements for both Australian and international audiences. e Graphic Design Section casts a specialist eye over all artwork from launch posters and banners to magazine advertisements and annual reports, while maintaining a creative approach to the branding of the Mint.

Maintaining a supply of products through the temporary shutdown of the production areas for refurbishment in 2008, has depended on the Graphic Design Section processing double the number of artwork briefs compared with a typical year. is had to be done while sustaining our objective of achieving a worldwide reputation for high quality and innovative artwork.

Our standard for world class quality products was represented in the prestigious 2008 Icons of the Commonwealth. e packaging design honoured the highly regarded signature coins of the three Royal Mints of the Commonwealth. Subtle embellishments such as embossing, spot varnishes and metallic inks enhanced the premium status of this product. achieved considerable recognition, including impressing the international numismatic community at the 2008 Berlin World Money Fair.

In the year ahead the graphic designers are looking to break new ground in terms of innovative packaging and maintain our contribution to excellence in a world class sustainable Mint.

Internal Communications

Our internal communications are aimed at making sure everyone in the Mint understands what we are trying to achieve. We are making internal communications a two-way street; listening to and encouraging people to help with minimising the impacts of change and making the best of emerging opportunities. Our strategy focuses on educating managers in the role of communication in making them effective and capable leaders. We will explore and promote personal and departmental relationships to build a 'One Mint' internal brand.

Change Management

When the Mint has implemented major change in the past it has tended to focus on processes and systems. We have critically reviewed this approach to change and appointed a Change Manager to work with consultants to develop a transformation management plan. Transformation management focuses on education, training and the use of two-way communications that are inclusive and transparent. e Mint will gain broad levels of participation and engagement from sta using a transformation plan which has people as the central focus of change and empowers them to share our vision, mission, values and objectives.

The new financial year brings more exciting opportunities for the Branch to continue to raise awareness of the Mint's activities. With the current refurbishment project due for completion in mid 2009, the Branch is looking forward to strengthening the Mint's brand and products awareness among our clients and customers.

Finance

e Mint implemented several measures designed to strengthen its working capital by aligning the Mint's operational and production activities better with the changing coinage requirements of the Australian community. is includes the establishment of a bu er stock, and redefining the basis for circulating coin revenue recognition from time of sale to time of production.

These measures were incorporated in the Mint's new Memorandum of Understanding (MOU) with Treasury that took effect from 1 January 2008.

As a result of applying the Finance Minister's Orders and applicable Australian Accounting Standards to these initiatives, the Mint reported an after tax operating surplus of \$31 million in 2007–08. This is represented by:

- the one off payment of \$20 million towards the establishment of a circulating coin buffer stock and
- \$11 million increase due to the change in the circulating coin revenue recognition.

The Mint's operating surplus was derived from gross income of \$112 million—an increase of \$51.2 million over 2006–07. This increase can be attributed to the 20 per cent (\$29 million) growth in circulating coin sales to the Reserve Bank of Australia. There was a corresponding increase in departmental expense (cost of goods sold) as a result of the additional sales.

The Mint's net assets increased from \$65 million at the end of 2006-07 to \$125 million at 30 June 2008. This increase is mainly attributable to:

- \$18 million in appropriation receivable being the capital appropriation not drawn down for major capital and
- payment of \$43 million seigniorage to the Official Public Account.

The Mint received audit clearance of its 2007–08 financial statements from the Australian National Audit Office (ANAO). The ANAO has again issued an unqualified audit report as shown in Appendix A.

The Commonwealth Certificate of Compliance requirements for 2007–08 were successfully met by the Mint. For the financial year 2007–08, the Mint introduced a bi-annual compliance sign-off, i.e. period ending 31 December 2007 and 30 June 2008. The overall outcome improved following delivery of training to sta .

Challenges for the future include management of risks associated with larger than normal inventory; securing implementation of major projects within budget and on time; and delivering e cient and e ective management of the Mint's fixed assets during and after the execution of major projects.

Procurement

e Mint is committed to continual improvement of its internal policies and procedures for the procurement of all goods and services. is is consistent with the Mint's Chief Executive's Instructions (CEIs) and the Commonwealth Procurement Guidelines (CPGs).

During the 2007–08 year, the Mint's procurement unit provided support by ongoing review of templates used for procurement; and guidance and advice on procedures for requests for tender including:

- coin blanks
- loose furniture
- ERP Enterprise Resource Planning software and
- material handling and warehousing system.

The Mint's procurement unit has expanded its staff to facilitate training and support for other areas of the Mint that are purchasing goods and services of high value and where contract negotiations are complex.

Sta attended training and workshops about the new procurement guidelines run by the Department of Finance and Deregulation.

The main priority for the procurement unit in the coming year is to implement a contracts register database for the monitoring and reviewing of all contracts.

Consultancies

Consistent with the CPGs Instructions the Mint engages consultants on the basis of:

- value for money
- · open and e ective competition
- · ethics and fair dealing
- · accountability and reporting
- national competitiveness and industry development and
- support for other Australian Government policies.

Typically, consultants are engaged to investigate or diagnose a defined issue or problem; carry out defined research, reviews or evaluations; provide independent advice and information or creative solutions to assist the Mint manage their decision making. e most common reasons for the engagement of consultancy services are:

- unavailability of specialist in-house resources in the short timeframe allowed
- the need for an independent study or review and
- specialist skills and knowledge not available in-house.
 - e selection methods used for consultancies are categorised in Table A.

During 2007–08, one new consultancy contract valued at \$10,000 and over was entered into involving total expenditure of \$76,182. In addition, two ongoing consultancy contracts valued at \$10,000 and over were active during the year involving total actual expenditure of \$528,807. Information on expenditure on contracts and consultancies is also available on the AusTender website **www.tenders.gov.au**

Table A - Consultancies valued at and over \$10,000 in 2007-08

Consultant Name	Description	Contract Price (\$)	Selection Process ⁽¹⁾	Justi cation ⁽²⁾
Acumen Alliance (ACT) Pty Ltd	IT Business Systems Consultancy	399,000	Open Tender	b
Lange Consulting and Software	Consultancy Services for Development of RFT for IT Systems Upgrade	53,625	Direct Source	b
Grosvenor Management Consulting	Transformation Management	76,182	Select Tender	b
Total consultancies over \$10,000		528,807		

(1) Open Tender: A procurement procedure in which a request for tender is published inviting all businesses that satisfy the conditions for participation to submit tenders. Public tenders are sought from the marketplace using the Australian Government Austender internet site.

Select Tender: A procurement procedure in which the procuring agency selects which potential suppliers are invited to submit tenders. Tenders are invited from a short list of competent suppliers.

Direct Sourcing: A form of restricted tendering, available only under certain de ned circumstances, with a single potential supplier or suppliers being invited to bid because of their unique expertise and/or their special ability to supply the goods and/or services sought.

- (2) Justi cation for decision to use consultancy:
- a Skills currently unavailable within agency
- b Need for specialised or professional skills
- c Need for independent research or assessment

Assets management

- e Mint manages both current and non-current assets in accordance with guidelines set out in the CEIs and Australian Accounting Standards.
 - e Mint's non-current assets are subject to an annual stocktake to ensure accuracy of records.
- e Mint's asset revaluation strategy, applied with sucient frequency, ensures correctness of the carrying fair value amount at reporting date. In 2007–08, the Australian Valuation Oce conducted a desktop revaluation of the Mint's coin collection, plant and equipment and leasehold improvements.

The Mint manages four types of fixed asset classes: plant and equipment, leasehold improvements, intangibles and the National Coin Collection. These assets have a total net value of \$32 million, including \$7 million work in progress associated with the Mint building refurbishment project.

All assets were assessed for impairment at the reporting date.

During 2007–08 the Capital Management Planning Group (CMPG) was established to assess, prioritise and identify funding sources for capital spends. e CMPG is responsible for the management of the Mint's Capital Management Plan (CMP) which was designed to ensure compliance to accounting standards and best practice including depreciation, funding, asset management; and to provide assurance that the Mint is meeting its obligations under the financial management framework and the Commonwealth Procurement Guidelines. Both the CMP and the CMPG provide an improved framework for capital purchases and funding that meet the Mint's business objective of ensuring that the Mint's assets fully support the business aims.

Security and Fraud Control

e refurbishment project continues to take up considerable time and e ort for the Mint Security section. The Security Section is responsible for the continuous monitoring and review of protective security requirements for the refurbishment project to ensure an appropriate level of protective security is maintained throughout the project construction stages. As a result of the shared facilities issues raised by the strategy of the construction program, the Mint completed 582 security checks for construction personnel in the 2007–08 financial year.

e Mint Security Section also provided advice to the Refurbishment Project Team on the design and implementation of protective security requirements. e refurbishment project provides further enhancements to the Mint's existing security systems.

The Mint has reviewed its Fraud Control Plan 2006–08 (FCP) in accordance with Commonwealth Fraud Control Guidelines. The update of the FCP was completed with reviews of all fraud risks and the implementation of adequate control measures to ensure compliance with all guidelines. The Mint is satisfied that appropriate fraud prevention, detection, investigation and reporting procedures are in place and that annual fraud data has been collected and reported in line with appropriate guidelines.

The Mint Security, Fraud and Ethics program was implemented in 2007. The plan was developed in order to increase the awareness of sta in the following areas:

- ethical behaviour standards
- · fraud prevention
- Australian Public Service Code of Conduct and
- Australian Government protective security standards.

Sta have been surveyed throughout the program to gauge its e ectiveness.

e Mint also completed a comprehensive review of its personnel security processes and its compliance with the Australian Government Protective Security Manual. e review noted a number of required changes that have been or are currently being implemented.

2008–09 looks to be another busy year for the Mint Security Team. While the refurbishment project is due for completion in 2009, the ongoing monitoring and review of the protective security requirements of the project will continue to be performed daily.

The refurbishment project will also necessitate a number of functional changes to Mint operations as the project moves towards completion. These functional changes will require the formulation and implementation of a number of new and reused policies and procedures to ensure the Mint functions and resources are adequately protected.

Prior to December 2008 the Mint will also develop and implement a new FCP. The new FCP will take account of any functional changes or high risk activities undertaken in the Mint. The FCP will also identify strategies and policies to remain fully compliant with the Commonwealth Fraud Control Guidelines.

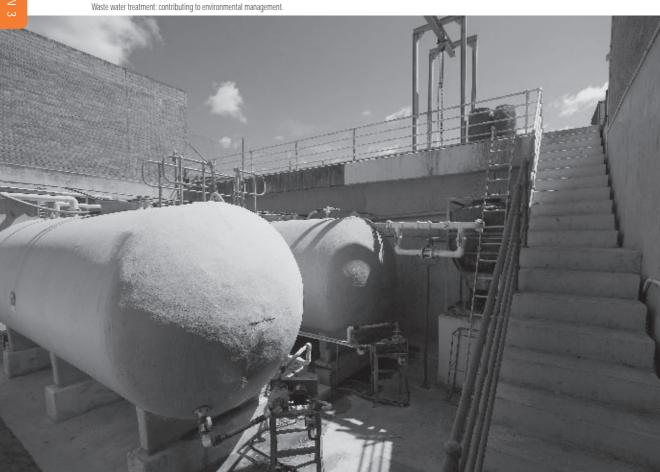

Ecologically Sustainable Development

e Mint continued to focus on how it could improve its environmental management practices in 2007–08, and has taken new initiatives, which have helped the Mint to improve performance under its Environmental Policy.

A review of operational procedures and processes has focused on providing specific strategies, including energy supply, energy use, delivery of goods and services, and redesign of production process ows, to achieve greater savings and increase conservation and waste minimisation.

Environmental Management

The Mint's Environment Management System has been improved to make sure ISO 14001:1996 standards are achieved. is has included a review of the Integrated Management Manual to improve the non-wasteful use of resources, and to reduce potential hazards to human health and the environment from emissions and wastes.

- e Mint encouraged the shared subscription of publications and promoted the substitution of electronic communications for paper and print media.
- e Mint has improved the recycling program for sta and visitors that includes new disposal procedures for classified, non-classified documents and packing materials.
 - e Mint maintained water conservation measures during the period by:
- compliance with stage 3 water restrictions
- monitoring of water consumption and the use of timers on manufacturing and production equipment with exception reporting at 15 minute time intervals
- · cessation of watering of lawns and gardens
- cessation of programmed window washing and
- increased maintenance, including taps and showers in bathrooms and kitchens.

Water consumption for this year was 16,204 kilolitres; a small increase of 7 per cent over the last year because of the resumption of coin production, following refurbishment processes.

Energy Management

e Mint has further improved its maintenance programs by monitoring all systems to reduce the consumption of energy. A consultant has been engaged to develop a new maintenance program for the safe and e cient operation of all building services.

Natural gas consumption was 3.5 million megajoules for the year and electricity consumption was 2.4 megawatts. This is a decrease of approximately 33 per cent and 11 per cent respectively on the previous year. The electricity consumption figure includes the additional requirements from building refurbishment construction activity.

A partial handover of the refurbished areas has enabled the use of the new energy monitoring system through the upgraded Building Management System.

Energy consumption for 2008–09 is expected to remain the same as in the previous year, pending the final handover and completion of the building refurbishment in mid 2009; following which, it is anticipated that further benefits and associated cost savings will be forthcoming, with the full implementation of measures being provided for by the building refurbishment.

Social Club

e Social Club has had another active year with both fund raising and social events. e Social Club and Mint sta are generous in their support of a number of charities and conduct fundraising activities.

Some activities during the year included:

A lunch time sausage sizzle to support the "Movember" men's health charity. The event was well attended by sta with several Mint men growing moustaches or agreeing to shave off their existing moustaches. The bidding was fast and furious for the great shave off and \$1,513 was raised for "Movember".

SECTION 3

e Mint Christmas Party was held at a local community club. In true Christmas spirit staff enjoyed the festivities and the raffle prizes were the best yet. The CEO presented long service and merit awards to staff. The CEO continues to use these events to highlight the benefits achieved from improvements to process, training and development, job rotation and new or refurbished equipment.

An Easter morning tea was held in the newly refurbished coining hall, with fun awards to deserving staff, with the main Easter raffle being described as "death by chocolate".

Senior Managers baked ANZAC biscuits for a morning tea held prior to the ANZAC Day holiday. A select group of sta were asked to taste test the o erings and declare a winner. In the interest of harmonious working relationships there was no clear winner.

As the refurbishment project concludes there will be more space available in the Mint to hold social club functions on a more frequent basis. Such functions are strongly supported by staff as an opportunity to acknowledge outstanding achievements, socialise across all Branches. They are a great way to keep all staff well informed of progress across our many projects and their implications for the whole Mint.

Corporate Governance

- e Mint's independent Advisory Board assists in providing strategic advice on good corporate governance practices, advising on corporate strategy and providing guidance to the Mint's Senior Management Committee.
- e Audit Committee is the other independent body that ensures accountability. Amongst dealing with a range of other matters during the year the Committee also reviews or endorses the Mint's Risk and Fraud Control Plans.
- e Mint Senior Management Committee meets regularly to discuss a wide range of policy issues including matters related to corporate governance. e Committee reviews audit, security, procurement, financial and other practices within the Mint to enhance our understanding and compliance with the governance framework.
- e Mint continues to monitor the committee structures which it operates within to ensure alignment with corporate objectives including a stronger governance framework. A review was undertaken of the Strategic Plan to ensure that governance objectives were given a high priority. A range of sta and contractor courses have been developed to increase awareness and understanding of these requirements.

Risk Management

The Mint's Risk Management Framework continues to be used as a guiding principal for staff and Managers in their decision making processes. Risk and assurance policies and procedures identify, plan for and help manage the risks associated with the business of manufacturing circulating and numismatic coin for Australia.

ese policies and procedures are consistent with our strategic directions and align with the Mint's CEIs.

- e Mint's framework for managing risk has four key elements:
- The Fraud Control Plan complies with Australian Government Fraud Control Guidelines
- The CEIs put into effect the Financial Management and Accountability (FMA) Act 1997
 requirements which set out responsibilities and procedures and provide an overarching
 framework for financial management. They also contain topics relating to risk management,
 accountability and corporate governance practices
- The internal audit plan identifies individual services and functions requiring audit.
 The plan incorporates issues raised by the ANAO in its review of the Mint's financial statements and also ANAO reports on cross-agency matters, previous internal audits, evaluations, emerging issues and more strategic risk management issues and
- Risk management and insurable risks are aligned through Comcover and Comcare.
- e Mint attends Comcover and other related forums to improve on its knowledge and awareness of risk management strategies and initiatives throughout the Commonwealth.

Internal and External Scrutiny

Audit

The Audit Committee convened four times during 2007–08. Its primary focus included reviewing the Mint's financial statements and a range of internal and external audit reports.

e Mint's Audit Committee is independently chaired by Mr Michael Burton, General Manager, Department of Finance and Deregulation. Mr Vipan Mahajan, Assistant Secretary, Department of Employment and Workplace Relations also acts as an independent member. The two remaining Mint member positions are filled by Mr Graham Smith, Deputy CEO and Mr Michael Ellery, Manager, Facilities Management.

The Mint utilised the services of independent internal auditors Ernst & Young and Walter Turnbull to undertake the range of internal activity identified by the Mint in their internal audit plan. A range of specialist advice was also sought during the year on related topics.

e Audit Committee has a continuous improvement approach to audit services and regularly reviews the Mint's audit program and scrutinises recommendations from completed internal audits, as well as relevant ANAO reviews and best practice guidelines.

The Internal Audit Plan identifies services and functions for auditing. It incorporates issues raised by the ANAO in its audit of the Mint's financial statements, recent ANAO reports on cross-agency matters, upcoming management issues, policy evaluations, previous internal audits and strategic risk management issues. In addition, a watching brief is maintained throughout the year on emerging or topical issues which may impact on the Mint.

Internal Audits

The Mint completed four audits during the 2007–08 program. Additionally assistance was provided to IT Systems and Fraud on specialist project issues.

e audits completed were:

- Records Management Arrangements the review focused on the records management
 policies and procedures adopted within the Mint and conducted analysis and testing
 to determine if the control environment was appropriate.
- **Collection Management** the review determined whether the national coin collection managed by the Mint was operating in an e cient and e ective manner.
- **Marketing Arrangements** the review determined whether the Mint marketing arrangements were adequately managed and were operating e ciently.
- **Asset Management Procedures** the purpose of this review was to test whether asset management policies and procedures su ciently met the requirements of the Mint.

Signi cant Developments in External Scrutiny

There were no significant developments in external scrutiny relating to judicial decisions and administrative decisions of administrative tribunals impacting on the Mint.

Similarly, there were no reports by the Auditor-General, a Parliamentary Committee or the Commonwealth Ombudsman significantly or directly impacting on the Mint.

Ethical Standards and Accountability

- e Mint's people values are very much aligned with the Australian Public Service values and are embedded in the Mint Agency Agreement and Performance Development System. ese values are also communicated and supported by members of the Mint Senior Management Committee whenever an opportunity arises.
- e Mint maintains ethical standards through a range of mechanisms including developing policies such as the Fraud Control Plan, the CEIs, IT acceptable use policies and contractor and consultant guidelines.
- e Mint continues to provide mandatory fraud and ethics awareness training courses during the year to all staff and contractors to supplement the existing framework. Additionally, a security education and awareness program continues to be improved on with one of those elements being a focus on ethical behaviours. IT security elements are now also included in the awareness program. Sta induction training has been reviewed with more of a focus on Mint and APS values and ethical standards.

Freedom of Information

Under subsection 8 (1) of the *Freedom of Information Act 1982*, the Mint must report on its activities. In 2007–08 the Mint did not receive any requests for information under the *Freedom of Information Act 1982*.

Organisation of the Mint

Details of the Mint's organisational and management structures are set out in this report. The Mint's functions and decision making powers exercised in carrying out those functions are described in the Chief Executive's Review and the Corporate Governance sections of this report.

Arrangements for outside participation

People or organisations outside the Australian Government administration may participate in forming policy or relating to aspects of the Mint's responsibility. ey can do this by writing to Treasury portfolio ministers, the Secretary of the Treasury, or the Chief Executive Officer of the Mint. In addition, the Mint website includes details of how the public can access information held within the Mint.

Categories of documents held by the Mint

- e Mint holds a wide range of correspondence, analysis and policy advice by Mint o cers, including comments on cabinet submissions and dra s of these and other documents.
- e Mint stores correspondence to and from Treasury ministers on matters falling within the Mint's portfolio responsibilities.
- e Mint also holds documents relating to its organisation and operations including personnel records, staffing records, financial and expenditure records and internal operations such as o ce procedures and instructions.

Freedom of information applications and initial contact points

The Mint Executive coordinates requests under the Freedom of Information Act 1982.

Applicants seeking access under the Act to Mint documents should apply in writing to:

The Chief Executive Officer Royal Australian Mint Denison Street DEAKIN ACT 2600

Attention: Freedom of Information Coordinator

Telephone enquiries should be directed to the Chief Executive Officer, telephone (02) 6202 6826, between 9:00am and 5:00pm Monday to Friday (except public or public service holidays).

APPENDIX A — INDEPENDENT AUDIT REPORT

INDEPENDENT AUDITOR'S REPORT

To the Minister for Superannuation and Corporate Law

Scope

I have audited the accompanying financial statements of Royal Australian Mint for the year ended 30 June 2008, which comprise: a Statement by the Chief Executive and Chief Finance Officer; Income Statement; Balance Sheet; Statement of Changes in Equity; Cash Flow Statement; Schedule of Commitments; Schedule of Contingencies; Schedule of Administered Items; and Notes to and forming part of the Financial Statements, including a Summary of Significant Accounting Policies.

The Responsibility of the Chief Executive for the Financial Statements

The Royal Australian Mint's Chief Executive is responsible for the preparation and fair presentation of the financial statements in accordance with the Finance Minister's Orders made under the Financial Management and Accountability Act 1997, including the Australian Accounting Standards (which include the Australian Accounting Interpretations). This responsibility includes establishing and maintaining internal controls relevant to the preparation and fair presentation of the financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

My responsibility is to express an opinion on the financial statements based on my audit. My audit has been conducted in accordance with the Australian National Audit Office Auditing Standards, which incorporate the Australian Auditing Standards. These Auditing Standards require that I comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Royal Australian Mint's preparation and fair

GPO Box 707 CANBERRA ACT 2601 19 National Circuit BARTON ACT Phone (02) 6203 7300 Fax (02) 6203 7777 presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Royal Australian Mint's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Royal Australian Mint's Chief Executive, as well as evaluating the overall presentation of the financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

Independence

In conducting the audit, I have followed the independence requirements of the Australian National Audit Office, which incorporate the requirements of the Australian accounting profession.

Auditor's Opinion

In my opinion, the financial statements of the Royal Australian Mint:

- (a) have been prepared in accordance with the Finance Minister's Orders made under the Financial Management and Accountability Act 1997, including the Australian Accounting Standards; and
- (b) give a true and fair view of the matters required by the Finance Minister's Orders including the Royal Australian Mint's financial position as at 30 June 2008 and its financial performance and cash flows for the year then ended.

Australian National Audit Office

Executive Director

Delegate of the Auditor-General

Canberra

ROYAL AUSTRALIAN MINT SCHEDULE OF COMMITMENTS

as at 30 June 2008

Footnote - relates to previous page

- Plant and equipment commitments are contracts for purchases of production related equipment.

2	Operating leases included are e ective	Operating leases included are e ectively non-cancellable and comprise of :				
	Nature of lease	General description of leasing arrangement				
	Lease for o ce accommodation	The initial period of o ce accommodation lease is still current. Current lease payments are subject to an annual increase of 2%. Following the completion of the building refurbishment project a new lease will take e ect. The term of this lease is 20 years from date of commencement. Lease payments of the new lease agreement are subject to an annual increase of 3% and a rental review to market every 5th anniversary.				
	Leases for computer equipment and o ce equipment	The lessor provides all computer equipment designated as necessary in the supply contract for 3 years with an option to extend the term for a xed period as agreed by both parties. The lessor provides all photocopier equipment designated as necessary in the supply contract for 4 years with an option to extend the term for a xed period as agreed by both parties.				

³ Other commitments comprise of amounts payable under agreements for which the contractor is yet to deliver the goods or perform the services.

The above schedule should be read in conjunction with the accompanying notes.

Note 20: Compensation and Debt Relief

Note 21: Reporting of Outcomes

for the year ended 30 June 2008

Note 1: Summary of Signi cant Accounting Policies

1.1 Objectives of the Royal Australian Mint

e Royal Australian Mint (the Mint) is a prescribed agency under the *Financial Management* and Accountability Act 1997. e objective of the Mint is to produce circulating coin for Australia plus a range of numismatic and minted non-coin products including medallions and tokens. e Mint's collector coin and minted non-con business is commercial within Government-set parameters.

e Mint is structured to meet one outcome and one output:

Outcome 1: Satisfy the Reserve Bank of Australia's forecast for circulating coin.

Output 1.1.1: Coin production, associated policy advice and visitor services.

The Mint's activities contributing toward this objective are classified as either Departmental or Administered. Departmental activities involve the use of assets, liabilities, revenues and expenses controlled or incurred by the Mint in it's own right. Administered activities involve the management by the Mint, on behalf of the Government, of the sale of circulating coin and repatriating funds to the Commonwealth through the seigniorage process.

1.2 Basis of preparation of the Financial Statements

The financial statements and notes are required by section 49 of the *Financial Management* and *Accountability Act 1997* and are a General Purpose Financial Report.

- e statements and notes have been prepared in accordance with:
- Finance Minister's Orders (or FMOs), for reporting periods ending on or after 1 July 2007) and
- Australian Accounting Standards (AAS) and Interpretations issued by the Australian Accounting Standards Board (AASB) that apply for the reporting period.

The financial report has been prepared on an accrual basis and is in accordance with historical cost convention, except for certain assets and liabilities, which as noted, are at fair value. Except where stated, no allowance is made for the effect of changing prices on the results or on the financial position of the Mint.

The financial report is presented in Australian dollars and values are rounded to the nearest thousand dollars unless otherwise specified.

Unless alternative treatment is specifically required by an Accounting Standard or the FMOs, assets and liabilities are recognised in the Balance Sheet when and only when it is probable that future economic benefits will flow to the Mint or a future sacrifice of economic benefits will be required and the amounts of the assets or liabilities can be reliably measured. However, assets and liabilities arising under agreements equally proportionately unperformed are not recognised unless required by an Accounting Standard. Liabilities and assets that are unrealised are reported in the Schedule of Commitments and the Schedule of Contingencies (other than unquantifiable or remote contingencies, which are reported at Note 12).

for the year ended 30 June 2008

Unless alternative treatment is specifically required by an accounting standard, revenues and expenses are recognised in the Income Statement when and only when the flow, consumption or loss of economic benefits has occurred and can be reliably measured.

Administered revenues, expenses, assets and liabilities and cash flows reported in the Schedule of Administered Items and related notes are accounted for on the same basis and using the same policies as for Departmental items, except where otherwise stated at Note 1.22.

1.3 Signi cant Accounting Judgements and Estimates

No accounting assumptions or estimates have been identified that have a significant risk of causing a material adjustment to carrying amounts of assets and liabilities within the next accounting period.

1.4 Statement of Compliance

Adoption of new Australian Accounting Standard requirements

No accounting standard has been adopted earlier than the application date as stated in the standard. e following new standards are applicable to the current reporting period:

Financial instrument disclosure

AASB 7 Financial Instruments: Disclosures is e ective for reporting periods beginning on or after 1 January 2007 (the 2007–08 financial year) and amends the disclosure requirements for financial instruments. In general AASB 7 requires greater disclosure than that previously required. Associated with the introduction of AASB 7 a number of accounting standards were amended to reference the new standard or remove the present disclosure requirements through AASB 2005-10 Amendments to Australian Accounting Standards [AASB 132, AASB 101, AASB 114, AASB 117, AASB 133, AASB 139, AASB 1, AASB 4, AASB 1023 & AASB 1038]. These changes have no financial impact but will affect the disclosure presented in future financial reports.

e following new standards, amendments to standards or interpretations for the current financial year have no material financial impact on the Mint.

•	AASB 101	Presentation of Financial Statement;
•	AASB 1048	Interpretation and Application of Standards;
•	AASB 2007-1	Amendments to Australian Accounting Standards arising from
		AASB interpretation 11;
•	AASB 2007-4	Amendments to Australian Accounting Standards arising from
		ED 151 and Other Amendments;
•	AASB 2007-7	Amendments to Australian Accounting Standards
		(AASB 1, 2, 4, 5, 107, 128);
•	AASB 2008-4	Amendments to Australian Accounting Standards — Key
		Management Personnel Disclosures by Disclosing Entities;

for the year ended 30 June 2008

• ERR Erratum Proportionate Consolidation (AASB 101, AASB 107,

AASB 121, AASB 127 Interpretation 13);

Interpretation 10 Interim Financial Reporting and Impairment;
Interpretation 11 AASB 2 Group and Treasury Share Transactions; and
Interpretation 1003 Australian Petroleum Resource Rent tax

Future Australian Accounting Standard requirements

e following new standards, amendments to standards or interpretations have been issued by the Australian Accounting Standards Board but are e ective for future reporting periods. It is estimated that the impact of adopting these pronouncements when e ective will have no material financial impact on future reporting periods.

•	AASB 3	Business Combinations
•	AASB 8	Operating Segments
•	AASB 101	Presentation of Financial Statements

		Sector Entities.

Other

e following standards and interpretations have been issued but are not applicable to the operations of the Mint.

AASB 1049 Whole of Government and General Government Sector Financial Reporting

AASB 1049 specifies the reporting requirements for the General Government Sector and has no effect on the Mint's financial statements.

1.5 Revenue

Revenue from Production of Circulating Coin

e Mint derives circulating coin revenue through retention of a Government approved transfer price from sale of circulating coin to the Reserve Bank of Australia (RBA). For the period 1 July to 31 December 2007 and in prior years, circulating coin revenue was recognised at the time of sale of circulating coin to the RBA. From 1 January 2008, consistent with the new Memorandum of Understanding (MOU) between the Mint and the Department of the Treasury, circulating coin revenue is recognised at the time of completion of production and classification of the circulating coins as finished goods in the Mint's inventory.

is change in the circulating coin revenue recognition from the point of sale to the RBA, to the point of completion of production has increased circulating coin revenue by \$11m in the current financial year.

for the year ended 30 June 2008

In addition, the new MOU allows the Mint a one-off payment of \$20m towards the establishment of a circulating coin bu er stock to provide for contingencies and meet any unexpected demand for circulating coin. This one-off payment has been recognised as Other Revenue (Refer to Note 4D) in the current year and transferred directly to a Bu er Stock Reserve (Refer to Note 1.8).

Revenue from Government

Amounts appropriated for Departmental appropriations for the year (adjusted for any formal additions and reductions) are recognised as revenue when the agency gains control of the appropriation, except for certain amounts that relate to activities that are reciprocal in nature, in which case revenue is recognised only when it has been earned.

Appropriations receivable are recognised at their nominal amounts.

Resources Received Free of Charge

Resources received free of charge are recognised as revenue when, and only when, a fair value can be reliably determined and the services would have been purchased if they had not been donated. Use of those resources is recognised as an expense.

Contributions of assets at no cost of acquisition or for nominal consideration are recognised as gains at their fair value when the asset qualifies for recognition, unless received from another Government Agency or Authority as a consequence of a restructuring of administrative arrangements (Refer to Note 1.7).

Resources received free of charge are recorded as either revenue or gains depending on their nature.

Revenue from the Sale of Goods and Services

Revenue from the sale of goods is recognised when:

- the risks and rewards of ownership have been transferred to the buyer;
- the seller retains no managerial involvement nor effective control over the goods;
- the revenue and transition costs incurred can be reliably measured; and
- it is probable that the economic benefits associated with the transaction will ow to the Mint.

Revenue from rendering of services is recognised by reference to the stage of completion of contracts at the reporting date. e revenue is recognised when:

- the amount of revenue, stage of completion and transaction costs incurred can be reliably measured and
- the probable economic benefits associated with the transaction will flow to the Mint.

for the year ended 30 June 2008

e stage of completion of contracts at the reporting date is determined by reference to the proportion that costs incurred to-date bear to the estimated total costs of the transaction.

Receivables for goods and services, which have 30 day terms, are recognised at the nominal amounts due, less any provision for bad and doubtful debts. Collectibility of debts is reviewed at balance date. An allowance for impairment is made when collectibility of the debt is no longer probable.

Interest Revenue

Interest revenue is recognised using the e ective interest method as set out in *AASB 139 Financial Instruments: Recognition and Measurement.* The interest recognised in the financial statements is adjusted against payments made under competitive neutrality arrangements.

Seigniorage and repurchase of circulating coin

Seigniorage is collected by the Mint on behalf of the Commonwealth. Seigniorage represents the di-erence between the face value of coinage sold to the RBA and its cost of production to the Mint plus any additional allowances for unavoidable costs and/or surplus agreed by the Department of the Treasury (i.e. the transfer price).

e Mint repurchases mutilated and withdrawn circulating coins on behalf of the Commonwealth. e costs incurred by the Mint in repurchasing circulating coins are offset to an extent by the sale of scrap metal and the balance is supplemented by the Commonwealth via a reduction in the total amount paid to the Commonwealth's O cial Public Account (refer Note 16).

e net revenues from circulating coin sales are not directly available to be used by the Mint for its own purposes and are remitted to the Commonwealth's O cial Public Account. Seigniorage for 2007–08 is \$90.2m (2006–07: \$98.3m).

1.6 Gains

FINANCIAL STATEMENTS

Resources Received Free of Charge

Resources received free of charge are recognised as gains when and only when a fair value can be reliably determined and the services would have been purchased if they had not been donated. Use of those resources is recognised as an expense.

Contributions of assets at no cost of acquisition or for nominal consideration are recognised as gains at their fair value when the asset qualifies for recognition, unless received from another Government Agency or Authority as a consequence of a restructuring of administrative arrangements (refer to Note 1.7).

Resources received free of charge are recorded as either revenue or gains depending on their nature.

for the year ended 30 June 2008

Sale of Assets

Gains from disposal of non-current assets are recognised when control of the asset has passed to the buyer.

1.7 Transactions with the Government as Owner

Equity injections

Amounts appropriated which are designated as 'equity injections' for a year (less any formal reductions) are recognised directly in Contributed Equity in that year.

Restructuring of Administrative Arrangements

Net assets received from or relinquished to another Commonwealth agency under a restructuring of administrative arrangements are adjusted at their book value directly against contributed equity.

Other distributions to owners

The FMOs require that distributions to owners be debited to contributed equity unless in the nature of a dividend. In 2007–08, there were no distributions to owners.

1.8 Reserves

Property, plant and equipment revaluation reserve

e balance of asset revaluation reserves in the balance sheet reflect differences between the fair value of the Mint's property, plant and equipment and coin collection revaluation reserve and their cost. ese unrealised gains are transferred directly to the relevant reserve and are not included in accounting profits. The unrealised gains on these assets are not distributable until the gains are realised through the sale of the relevant asset.

Bu er Stock Reserve

e Bu er Stock Reserve provides funding for the establishment of a circulating coin bu er stock to meet any unexpected demand for circulating coin and provide for contingencies. (refer Note 1.5)

ere are no restrictions on the distribution of this reserve to owners.

1.9 Employee Bene ts

Liabilities for services rendered by employees are recognised at the reporting date to the extent that they have not been settled.

Liabilities for 'short-term employee benefits' (as defined in AASB 119) and termination benefits due to be settled within twelve months of balance date are measured at their nominal amounts.

for the year ended 30 June 2008

The nominal amount is calculated with regard to the rates expected to be paid on settlement of the liability.

All other employee benefit liabilities are measured as the present value of the estimated future cash out ows to be made in respect of services provided by employees up to the reporting date.

Leave

The liability for employee benefits includes provision for annual leave and long service leave. No provision has been made for sick leave as all sick leave is non-vesting and the average sick leave taken in future years by employees of the Mint is estimated to be less than the annual entitlement for sick leave.

e leave liabilities are calculated on the basis of employees' remuneration, including the Mint's employer superannuation contribution rates to the extent that the leave is likely to be taken during service rather than paid out on termination.

e liability for long service leave has been determined by reference to the work of an actuary as at 30 June 2007. The estimate of the present value of the liability takes into account attrition rates and pay increases through promotion and in ation. e Mint undertook a review of staff numbers, age profile and leave entitlements at 30 June 2008 to confirm that there had been no significant change in any of these factors during the current year. Hence, an actuarial review was not undertaken in the current year.

Superannuation

Eligible ongoing employees of the Mint are members of the Commonwealth Superannuation Scheme (CSS), the Public Sector Superannuation Scheme (PSS) or the PSS accumulation plan (PSSap).

The CSS and PSS are defined benefit schemes for the Commonwealth. The PSSap is a defined contribution scheme.

The liability for defined benefits is recognised in the financial statements of the Australian Government and is settled by the Australian Government in due course. is liability is reported by the Department of Finance and Deregulation as an Administered item.

e Mint makes employer contributions to the employee superannuation scheme at rates determined by an actuary to be succient to meet the cost to the Government of the superannuation entitlements of the Mint's employees. e Mint accounts for the contributions as if they were contributions to defined contribution plans.

From 1 July 2005, new employees are eligible to join the PSSap scheme.

The liability for superannuation recognised as at 30 June represents an accrual for the final fortnight of financial year.

for the year ended 30 June 2008

1.10 Leases

A distinction is made between finance leases and operating leases. Finance leases effectively transfer from the lessor to the lessee substantially all the risks and benefits incidental to ownership of leased non-current assets. An operating lease is a lease that is not a finance lease. In operating leases, the lessor effectively retains substantially all such risks and benefits.

Where a non-current asset is acquired by means of a finance lease, the asset is capitalised at either the fair value of the lease property or, if lower, the present value of minimum lease payments at the inception of the contract and a liability is recognised at the same time and for the same amount.

The discount rate used is the interest rate implicit in the lease. Leased assets are amortised over the period of the lease. Lease payments are allocated between the principle component and the interest expense.

Operating lease payments are expensed on a straight line basis which is representative of the pattern of benefits derived from the leased assets.

1.11 Borrowing Costs

All borrowing costs are expensed as incurred.

1.12 Cash

Cash and cash equivalents includes notes and coins held and any deposits in bank accounts, including deposits held in the O cial Public Account (OPA), with an original maturity of 3 months or less that are readily convertible to known amounts of cash and subject to insignificant risk of changes in value. Cash is recognised at its nominal amount.

1.13 Financial Assets

The Mint classifies its financial assets in the following categories:

- Financial assets 'at fair value through profit or loss';
- 'held-to maturity investments';
- 'available-for-sale' financial assets; and
- 'loans and receivables'.

The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

Financial assets are recognised and derecognised upon 'trade date'.

for the year ended 30 June 2008

E ective interest method

The effective interest method is a method of calculating the amortised cost of a financial asset and of allocating interest income over the relevant period. e e e ective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset, or, where appropriate, a shorter period.

Income is recognised on an effective interest rate basis except for financial assets 'at fair value through profit or loss'.

Financial assets at fair value through pro t or loss

Financial assets are classified as Financial Assets at fair value through profit or loss where the Financial Assets:

- have been acquired principally for the purpose of selling in the near future;
- is a part of an identified portfolio of financial instruments that the agency manages together and has a recent actual pattern of short-term profit-taking; or
- is a derivative that is not designated and e ective as a hedging instrument.

Assets in this category are classified as current assets.

Financial assets at fair value through profit or loss are stated at fair value, with any resultant gain or loss recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest earned on the financial asset.

Available-for-sale Financial Assets

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless management intends to dispose of the asset within 12 months of the balance sheet date.

Available-for-sale financial assets are recorded at fair value. Gains and losses arising from changes in fair value are recognised directly in the reserves (equity) with the exception of impairment losses. Interest is calculated using the e ective interest method and foreign exchange gains and losses on monetary assets are recognised directly in profit or loss. Where the asset is disposed of or is determined to be impaired, part or all of the cumulative gain or loss previously recognised in the reserve is included in profit for the period.

Where a reliable fair value can not be established for unlisted investments in equity instruments cost is used. e Mint has no such instruments.

Held-to-maturity investments

Non-derivative financial assets with fixed or determinable payments and fixed maturity dates that the Mint has the positive intent and ability to hold to maturity are classified as held-to-maturity investments. Held-to-maturity investments are recorded at amortised cost using the e ective interest method less impairment, with revenue recognised on an e ective yield basis.

for the year ended 30 June 2008

Loans and receivables

Trade receivables, loans and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as 'loans and receivables'. They are included in current assets, except for maturities greater than 12 months after the balance sheet date. These are classified as non current assets. Loans and receivables are measured at amortised cost using the e ective interest method less impairment. Interest is recognised by applying the e ective interest rate.

Impairment of Financial Assets

Financial assets are assessed for impairment at each balance date.

- financial assets held at Amortised Cost If there is objective evidence that an
 impairment loss has been incurred for loans and receivables or held to maturity
 investments held at amortised cost, the amount of the loss is measured as the di erence
 between the asset's carrying amount and the present value of estimated future cash ows
 discounted at the asset's original e ective interest rate. e carrying amount is reduced by
 way of an allowance account. e loss is recognised in the Income Statement.
- Available for sale financial assets If there is objective evidence that an impairment loss
 on an available for sale financial asset has been incurred, the amount of the difference
 between its cost, less principal repayments and amortisation, and its current fair value,
 less any impairment loss previously recognised in expenses, is transferred from equity to
 the Income Statement.
- Available for sale financial assets (held at cost) If there is objective evidence that an
 impairment loss has been incurred the amount of the impairment loss is the di erence
 between the carrying amount of the asset and the present value of the estimated future
 cash ows discounted at the current market rate for similar assets.

1.14 Financial Liabilities

Financial liabilities are classified as either financial liabilities 'at fair value through profit or loss' or other Financial liabilities.

Financial liabilities are recognised and derecognised upon 'trade date'.

Financial liabilities at fair value through pro t or loss

Financial liabilities at fair value through profit or loss are initially measured at fair value. Subsequent fair value adjustments are recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability.

Other nancial liabilities

Other financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis.

for the year ended 30 June 2008

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period.

Supplier and other payables

Supplier and other payables are recognised at amortised cost. Liabilities are recognised to the extent that the goods or services have been received (and irrespective of having been invoiced).

1.15 Contingent Liabilities and Contingent Assets

Contingent Liabilities and Assets are not recognised in the Balance Sheet but are reported in the relevant schedules and notes. They may arise from uncertainty as to the existence of a liability or asset, or represent an existing liability or asset in respect of which the amount cannot be reliably measured. Contingent assets are disclosed when settlement is probable but not virtually certain and contingent liabilities are recognised when settlement is greater than remote.

1.16 Financial Guarantee Contracts

Financial guarantee contracts are accounted for in accordance with AASB139. They are not treated as a contingent assets or liabilities, as they are regarded as financial instruments outside the scope of AASB137.

1.17 Acquisition of Assets

Assets are recorded at cost on acquisition except as stated below. The cost of acquisition includes the fair value of assets transferred in exchange and liabilities undertaken. financial assets are initially measured at their fair value plus transaction costs where appropriate.

Assets acquired at no cost, or for nominal consideration, are initially recognised as assets and revenues at their fair value at the date of acquisition, unless acquired as a consequence of restructuring of administrative arrangements. In the latter case, assets are initially recognised as contributions by owners at the amounts at which they were recognised in the transferor Agency's accounts immediately prior to the restructuring.

1.18 Property, Plant and Equipment

Asset recognition threshold

Purchases of property, plant and equipment are recognised initially at cost in the Balance Sheet, except for purchases costing less than \$2,000 which are expensed in the year of acquisition (other than where they form part of a group of similar items which are significant in total).

e initial cost of an asset includes an estimate of the cost of dismantling and removing the item and restoring the site on which it is located. As the Mint has no obligation to restore

for the year ended 30 June 2008

or makegood any alterations to its rental premises no costs for restoration or makegood of premises has been added to the value of the Mint's leasehold improvements and no provision for 'makegood' has been recognised.

Revaluations

Fair values for each class of asset are determined as shown below:

Asset class	Fair value measured at:
Plant & equipment	Market Selling Price
Leasehold improvements	Depreciated replacement cost

Following initial recognition at cost, property plant and equipment are carried at fair value less accumulated depreciation and accumulated impairment losses. Valuations are conducted with succient frequency to ensure that the carrying amounts of assets do not dier materially from the assets' fair values as at the reporting date. eregularity of independent valuations depends upon the volatility of movements in market values for the relevant assets.

Revaluation adjustments are made on a class basis. Any revaluation increment is credited to equity under the heading of asset revaluation reserve except to the extent that it reverses a previous revaluation decrement of the same asset class that was previously recognised through the operating result. Revaluation decrements for a class of asset are recognised directly through the operating result except to the extent that they reverse a previous revaluation increment for that class.

Any accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset and the asset restated to the revalued amount.

Depreciation

Depreciable property, plant and equipment are written o to their estimated residual values over their estimated useful lives to the Mint using, in all cases, the straight-line method of depreciation.

Depreciation rates (useful lives), residual values and methods are reviewed at each reporting date and necessary adjustments are recognised in the current, or current and future reporting periods, as appropriate.

Depreciation rates applying to each class of depreciable asset are based on the following useful lives:

	2008	2007
O ce equipment	5 years	5 years
Leasehold Improvements	15 years	15 years
Factory machinery	10-20 years	10-20 years

for the year ended 30 June 2008

Impairment

All assets were assessed for impairment at 30 June 2008. Where indications of impairment exist, the asset's recoverable amount is estimated and an impairment adjustment made if the asset's recoverable amount is less than its carrying amount.

e recoverable amount of an asset is the higher of its *fair value less costs to sell* and its value in use. Value in use is the present value of the future cash flows expected to be derived from the asset. Where the future economic benefit of an asset is not primarily dependent on the asset's ability to generate future cash ows, and the asset would be replaced if the Mint were deprived of the asset, its value in use is taken to be its depreciated replacement cost.

1.19 Intangibles

The Mint's intangibles comprise externally acquired software for internal use. These assets are carried at cost less accumulated amortisation and accumulated impairment losses.

Intangible assets are amortised on a straight-line basis over their anticipated useful lives. The useful lives of the Mint's software are 3–5 years (2007: 3–5 years).

All software assets were assessed for indications of impairment as at 30 June 2008. No indicators of impairment were noted.

1.20 Inventories

Inventories held for sale are at the lower of cost and net realisable value.

Inventories held for distribution are valued at cost, less any loss of service potential.

Costs incurred in bringing each item of inventory to its present location and condition are assigned as follows:

- Raw materials and stores purchase cost on a first-in-first-out basis.
- Finished goods and work in progress cost of direct materials and labour plus attributable costs that are capable of being allocated on a reasonable basis.

Inventories acquired at no cost or nominal considerations are measured at current replacement cost at the date of acquisition.

1.21 Taxation/Competitive Neutrality

The Mint is exempt from all forms of taxation except fringe benefits tax (FBT) and the goods and services tax (GST).

Revenues, expenses and assets are recognised net of GST:

- except where the amount of GST incurred is not recoverable from the Australian Taxation Office; and
- · except for receivables and payables.

for the year ended 30 June 2008

Competitive Neutrality

The Mint sells collector coin and minted non-coin products on a for-profit basis. Under Competitive Neutrality arrangements, the Mint is required to make Australian Income Tax Equivalent payments to the Government, in addition to payments for FBT and GST. Notional interest calculation for purposes of competitive neutrality is based on current 10 year market bond rates.

The income tax expense or revenue for the period is the tax payable on the current period's taxable income based on the national income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements and to unused tax losses.

1.22 Reporting of Administered Activities

Administered revenues, assets and cash ows are disclosed in the Schedule of Administered Items and related Notes.

Except where otherwise stated below, Administered items are accounted for on the same basis and using the same policies as for Departmental items, including the application of Australian Accounting Standards.

Administered Cash Transfers to and from O cial Public Account

Revenue collected by the Mint on behalf of, and for use by the Government, is Administered revenue. Collections are transferred to the O cial Public Account (OPA) maintained by the Department of Finance and Deregulation. Conversely, cash is drawn from the OPA to make payments under Parliamentary appropriation on behalf of Government. ese transfers to the OPA are adjustments to the Administered cash held by the Mint and reported as such in the Statement of Cash Flows in the Schedule of Administered Items and in the Administered Reconciliation Table in Note 18. us the Schedule of Administered Items largely re ects the Government's transactions, through the Mint, with parties within the Government.

Revenue

All Administered revenues are revenues relating to the course of ordinary activities performed by the Mint on behalf of the Australian Government. All Administered revenues relate to Seigniorage (refer to Note 1.5).

for the year ended 30 June 2008

Note 2: Events after the Balance Sheet Date

There were no significant events after the balance sheet date.

Note 3: Economic Dependency

e Mint is economically dependent on the Reserve Bank of Australia for the purchase of circulating coin.

Separate from its production and sale of circulating coins, the Mint produces and sells numismatic and other collectible items on a 'for-pro' t' basis and is subject to the Australian Government's Competitive Neutrality Policy in relation to those activities. The above amounts have been calculated as being payable to the Australian Government in the form of company income and payroll taxes under the *Income Tax Assessment Acts* and the *ACT Payroll Tax Act 1987* had they applied. These amounts are payable by the Mint to the O cial Public Account net of competitive neutrality interest income calculated on cash derived from those activities that has been deposited in the O cial Public Account.

for the year ended 30 June 2008

Leasehold improvements and plant and equipment are subject to revaluation. The carrying amount is included in the valuation gures on previous page.

All revaluations are conducted in accordance with the revaluation policy stated at Note 1.17. On 30 June 2008, an independent valuer, the Australian Valuation O ce conducted the revaluations.

Revaluation increments of \$5,273 for plant and equipment (2007: \$3,184,982) were credited to the asset revaluation reserve by asset class and included in the equity section of the balance sheet; there were no revaluation increments/decrements for leasehold improvements (2007: decrements of \$87,774 expensed).

No indicators of impairment were found for infrastructure, plant and equipment.

Note 12: Contingent Liabilities and Assets

Quanti able Contingencies

As at 30 June 2008, the Mint had no quantiable contingencies. (2007: \$0).

Unquanti able Contingencies

At 30 June 2008, the Mint had no unquanti able contingencies (2007: \$0).

Remote Contingencies

At 30 June 2008, the Mint has a remote contingent asset of \$1M relating to a supplier nancial undertaking to ensure due and proper performance of the contract with the Mint (2007: \$0). The probability of the Mint invoking this guarantee is considered remote as the supplier is meeting its contractual obligations as and when they occur.

The Mint has no remote contingent liabilities as at 30 June 2008 (2007: \$0).

Note 13: Senior Executive Remuneration	2008	2007

There is no net interest income/expense from nancial liabilities not at fair value from pro t and loss in the years ending 2008 and 2007.

for the year ended 30 June 2008

Note 15D: Fair Value of Financial Instruments

The carrying value of the Mint's nancial instruments as disclosed in the Balance Sheet equals their fair value as at balance date.

Note 15E: Credit risk

The Mint is exposed to minimal credit risk as receivables are cash and trade receivables.

The maximum exposure to credit risk is the risk that arises from a potential default of a debtor. This amount is equal to the total amount of trade receivables (2008: \$1,082,000 and 2007: \$226,000). The Mint has assessed the risk of default on payment and made an allocation of \$12,000 to an allowance for impairment of debts account in 2008 (2007: \$6,000).

The Mint manages its credit risk by undertaking background and credit checks prior to allowing a debtor relationship. In addition the Mint has policies and procedures that guide the application of employee debt recovery techniques.

The Mint trades only with recognised, creditworthy third parties and as such holds no collateral to mitigate against risk.

Credit quality of nancial instruments not past due or individually determined as impaired.

	\$'000	\$'000	\$'000	\$'000	\$'000
Goods and services receivable		-	-	6	6
Total		-	-	6	6

At 30 June 2008 goods and services receivable of \$12,000 have been individually assessed as impaired (2007: \$6,000). Collectibility of trade receivables is reviewed on an on-going basis at an operating unit level. Individual debts that are known to be uncollectible are written o when identified. An impairment allowance is recognised when there is objective evidence that the Mint will not be able to collect the receivable. Financial disculties of the debtor and default of payments are considered objective evidence of impairment.

Note 15F: Liquidity risk

The Mint's liabilities include, suppliers payable, seigniorage payable and competitive neutrality payable to the Government. The exposure to liquidity risk is based on the notion that the Mint will experience diculty in meeting its obligations associated with nancial liabilities. The risk of the Mint experiencing liquidity problems is highly unlikely due to appropriation funding for capital purchases and the provisions of the Memorandum of Understanding between the Mint and the Department of Treasury. In addition, the Mint has policies in place to ensure timely payments are made when due.

The Mint's exposure to liquidity is assessed as \$Nil (2007: \$Nil).

The following table illustrates the maturities for nancial liabilities

2008

	On demand	within 1 year	1 to 5 years	> 5 years

for the year ended 30 June 2008

Note 15G: Market risk

Metal prices are determined by movements in the international metal market and uctuations in the Australian dollar. As a consequence, the Mint's raw material inventory and cost of goods sold are a ected by movements in these prices. The Mint actively manages this exposure to ensure that the risk are reduced to non-material levels by:

- specifying that contracts for the supply of precious metals be in Australian Dollars, thereby limiting the Mint's exposure to uctuations in foreign currencies;
- scheduling the purchase of precious metals at times to avoid known global seasonal peaks, unless the purchase is unavoidable, in which case minimum quantities are purchased;
- requiring non-precious metal suppliers to set the metal price at the average settlement price quoted on the London Metal Exchange for the three months prior to delivery, thereby eliminating seasonal uctuations in non-precious metal prices; and
- denominating non-precious metal contracts in Australian dollars at an agreed exchange rate at the time of order.

Note 15H: Assets Pledged/or held as collateral

The Mint has no assets pledged/held as collateral.

Note 16: Administered Reconciliation Table		
	2008	2007

Total balance carried to the next period	18,588	22,472

In the current year a \$20m additional receipt was credited to the Special Account (2007:\$Nil) for money retained from the Seigniorage payable to the Commonwealth to meet the costs of establishing a circulating coin bu er stock. This bu er stock was established to provide for contingencies and meet any future unexpected demand for circulating coin (refer Note 1.8). The retention of Seigniorage money for this purpose is provided for in the Memorandum of Understanding between the Mint and the Department of the Treasury e ective 1 January 2008. This receipt is within the purpose of the Special Account as the money was retained to meet the costs of establishing a circulating coin bu er stock, which forms part of the cost of 'producing, supplying, managing and operating' circulating coin.
